

Mascrete

WP-200

INTEGRAL WATERPROOF LIQUID

Mascrete WP-200 is an integral water proofing liquid developed by group of experts from industry in it's laboratory. Using water block technology, small holes formed during concrete mix and mortar mix gets arrested using this liquid. No seepage and dampness can be seen while using this product appropriately. For assured water proofing of your buildings, use ICP's Mascrete WP-200 in all your concreting needs.

Mascrete WP-200 Benefits

- It avoids entering of moisture and rain water into the concrete or mortar surface
- Dampness can be avoided due to arrest of moisture ingress
- It safeguards entire building from severe weathering effects
- Acts as a guardian against sulphate and chloride attack due to its high impermeable nature
- Improves concrete durability
- Leads to corrosive concrete without porosity
- Protects concrete from corrosion

Utility of Mascrete WP-200

- Can be added in all concrete mix
- Mascrete WP-200 can be added with all mortar mix at specified dosage
- Structural applications from footing to roof slab

Areas of usage

- Waterproofing of Concrete and Sand-cement mortars
- Basements
- Roof Slabs and Screeds
- Water Tanks and Water Retaining Structures
- Bathrooms and Balconies
- Columns & Beams

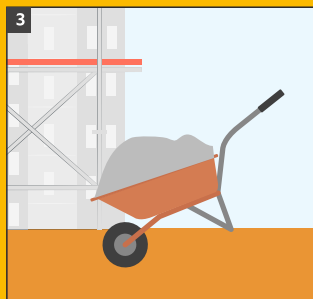

Directions for use

Mix cement, sand and aggregates, as per the mix design. Add only 50% of required water and mix for 2-3 minutes.

Add 200mL of MASCRETE WP-200 to the balance 50% of water and thoroughly mix the concrete. Add water as required for consistency.

A High quality, cohesive, waterproof, durable concrete mix of your dream home is ready to pour.
